KEEP YOUR WORKFORCE AND CUSTOMERS SAFE

As we return to work, states are issuing executive orders to businesses to assure safety and protection. One of these orders is for employers to provide face coverings to their employees. Our non-medical grade masks are the solution to this new requirement.

PROTECTION

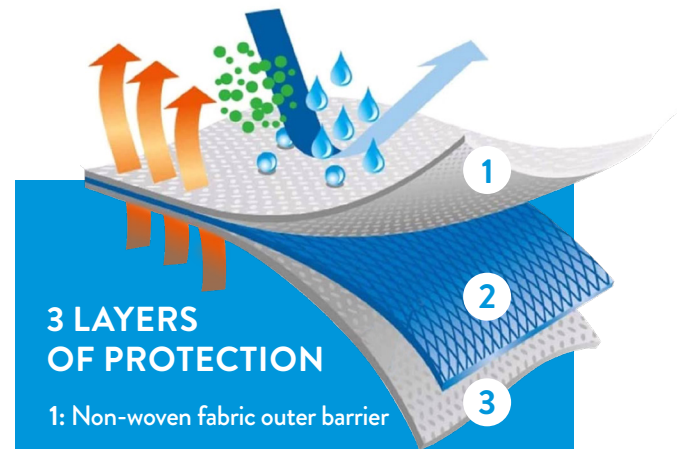

IAM masks create a physical barrier to protect the user from hazards as well as protect other people against infection from the person wearing the surgical mask.

100% HYDROPHOBIC

Hydrophobic? This is protection from splashes of large droplets of blood or body fluids. Our masks do not allow liquid to pass through the filter material. Many off-brand masks out there do not provide this level of protection.

ESTABLISHED

IAM, a Michigan company has been offering filtration products since 2013. We've been committed to safety from the start and will continue to do so during these changing times.

3 LAYERS OF PROTECTION

- 1: Non-woven fabric outer barrier
- 2: 100% Hydrophobic Filter Barrier
- 3: Moisture Wicking Layer to keep moisture away from mouth and skin

FEATURES

- Hydrophobic, preventing transfer of bodily fluids
- Designed to fit tighter around the face than other surgical face masks
- Low air and moisture resistance allowing for uninhibited breathing
- Bulk quantities available - 3,000 masks per case
- Extremely lightweight - keeps you cool for Summer use
